EDUCATION

Vellore Institute of Technology

Bachelor of Technology (Information Technology)

Vellore, India

August 2021 – June 2025

- CGPA – 8.36/10.
- Relevant Coursework – Data Structures and Algorithms, Big Data Analytics, Blockchain Technology, Differential Equations.
- Capstone Project – ECommerce Chatbot: Automated 78% of customer queries, reducing response time from 5 minutes to 3 seconds, delivering real – time recommendations using 45,000 product entries and improving user engagement by 42%.

CAREER

Suzlon Energy Limited

AI Engineer, CEO Office (Manufacturing) – AI, Data & Digitisation Strategy

Pune, India

June 2025 – Present

- Led the Data Engineering, BI, and GenAI roadmap for the manufacturing division, and delivered analytics solutions across 10 plants in Asia and Europe while partnering with 20 senior stakeholders, including CXO leadership.
- Built end – to – end data pipelines that consolidated over 50 operational data sources across 10 plants into a unified source of truth, significantly reducing ad hoc reporting requests for over 300 business users.
- Developed and implemented 14 dashboards and 7 chatbots covering 250+ KPIs across Safety, Quality, Productivity, Delivery, Cost, Manpower, and Energy that realized \$3 million in annualised savings and productivity gains.
- Delivered self – service analytics across 7 operational domains while scaling predictive quality models and automated alerting frameworks across 40 production lines, supporting yield improvement and downtime reduction initiatives tied to plant – level KPIs.
- Partnered with manufacturing strategy teams on the digitisation roadmap, deploying shop floor transaction systems and coordinating the Business Review Committee with 23 cross – functional stakeholders, that contributed to \$4.8 million in cost savings.

Georgia Institute of Technology (Georgia Tech Research Institute)

Cybersecurity Summer Intern

Atlanta, United States of America

May 2024 – August 2024

- Selected for the internship, among 1000 applicants, and worked with Matt Sanders (Director of Research Computing and Data, Georgia Tech) on a high – complexity healthcare challenge, bridging decades – old hospital systems with cloud EHRs used across the USA, where interoperability gaps impact patient care.
- Owned core components of a security middleware for large – scale patient data pipelines, resolved over 50 critical integration failures and enabled production – ready data exchange across legacy and modern systems, while delivering insights to senior researchers.

Emory University/Georgia Institute of Technology

AI Research Intern

Atlanta, United States of America

January 2024 – September 2024

- Conducted research under Dr. Rakesh Shiradkar and developed an automated deep learning pipeline for CT – based sarcopenia assessment, that achieved a prediction accuracy of 94% and 1mm human – level accuracy across 1000+ scans.
- Reduced analysis time from 10 minutes to under a second per scan by replacing manual workflows with a deployable AI system.

Indian Institute of Technology – Jammu

Research Intern (5G and Network Security)

Jammu, India

October 2023 – December 2023

- Analysed containerized IDS/IPS deployment for secure traffic routing in 5G networks under Dr. Samareesh Bera, addressed high – reliability, low – latency constraints, and improved throughput by 19% under peak loads across network scenarios.

EXTRACURRICULAR ACTIVITIES

Suzlon Energy Limited

Volunteer Educator (CSR)

Pune, India

June 2025 – Present

- Led weekly AI literacy sessions for over 50 students of the plant's staff, and introduced fundamentals of AI and computational thinking, thereby expanding access to tech education for underserved groups.

Vellore Institute of Technology

Operations and Marketing Head, ACM Student Chapter

Vellore, India

March 2022 – August 2024

- Raised \$11,000 via over 200 cold calls to corporate partners, and secured sponsorships for hackathons and ideathons.
- Led operations for multi – day events with 500 participants, while managing logistics, vendors, and cross – team execution.

Becoming I Foundation

Volunteer

Vellore, India

March 2022 – August 2024

- Taught Python and Mathematics to 200 students in 4 government schools by designing a curriculum for first – time computer users.

ADDITIONAL INFORMATION

- Skills – SQL, Python, Power BI, AI/ML – Predictive Modeling, Deep Learning & Computer Vision, Cybersecurity, Project Management.
- Languages – English (Native), Hindi (Native), French (Elementary Proficiency).
- Hobbies – Basketball.
